

Live scanner wont work

Posted by echoboy - 2009/05/23 11:49

I cant get the live scanner to work on my compter. Any suggestions on how to make it work?

Hello. Although the player auto-loads... it does not begin to auto play. To listen, click the dark grey play button, found towards the bottom left of the player. If you have to, try using another browser. If you still cannot get it to work, please let me know what browser you are using.

I tried using IE8 and Firefox...neither would load the Fire/EMS scanner.

Thanks for your assistance.

It sounds like you need the latest version of adobe flash player. You can go to <http://get.adobe.com/flashplayer/> to get it.
